Full Stack Developer
Job Specification

Oct 2020 | Authored by Fidel Labs

Job description

This role is responsible in supporting the Development Team and Technical Support operation of the company. It will be mainly supporting in designing, drafting, developing and testing digital products as prescribed by the company's management.

You will take full ownership of the projects you will be given and work closely with the rest of the team. Our products are a range of mobile and web applications and we require you to be versatile and result driven.

Responsibilities

- Design and implementation of web and mobile applications
- Write both backend and front-end components
- Manage deployment and continuous integration on AWS and other cloud providers
- Collaborate within the team, to transform product/solution briefs into individual deliverable components or tasks

Skills

- At least two years' experience with:
  - Writing HTML, CSS, and JavaScript.
  - Familiarity with at least one the following Javascript frameworks such as React, Vue or Angular
  - Database design and management, including being up on the latest practices and associated versions
  - Server management and deployment for the relevant environment - experience working with AWS is preferred
- Familiarity with a relevant and globally supported framework—both front-end and back-end, if necessary—(e.g., React, Vue, Laravel or Flask)
- Ideally, familiarity with CSS preprocessors, bundlers, and associated languages/syntaxes/libraries (e.g., Sass, Less, and webpack)
- Thorough understanding of user experience and possibly even product strategy
- Experience implementing testing platforms and unit tests
- Proficiency with Git
- Appreciation for clean and well documented code
- Experience running production scale django application is a plus

What you will get

We are a team of experienced digital services designers and developers who are keen in building innovative and impactful products for the Ethiopian market. We are eager to support you in your journey to be one of the best product developers and expect you to be as excited and committed as we are.

Working with founders who have over 40 years of experience in building, managing and marketing digital technologies for Fortune 500 companies in the UK, US and Finland you'll learn so much more.

Apart from the statutory Pension Allowance that we'll match per the national scale:

- **25 Days:** Holidays excluding Official holidays (Calendar Holidays)

- **Flexi time:** Do your daily hours any time between 8h00-10h00 and 15h30-17h30

- **Internet Allowance:** of upto **1500 Birr/month**

- **Dynamic Working:** you can work as much as you want from home or pop by the office

    Salary is negotiable and commensurate with the role and experience.

If this sounds like a role you want to apply for send us examples or your work/projects to hello@fidel-labs.co

Be prepared to explain your specific contribution and relevant technical details for these projects in the interview we'll arrange once we see what we like.

We do not do CVs or Degrees. We want to see tangible work accomplishments.
